

BIBUS HYDRAULIK

BIBUS HYDRAULIK AG is a renowned Swiss industrial company and a leading systems integrator in engineering, trading, and services. We provide comprehensive system solutions for both mobile and industrial markets. As a full-service provider with extensive expertise in hydraulics and automation (control software), we develop tailor-made solutions for our customers.

In recent years, we have successfully established ourselves as a systems integrator in the field of electrification and have implemented several projects, ranging from rail vehicles to trucks. The megatrend of electromobility in the off-/on-highway sector, combined with the high satisfaction of our customers, has resulted in a well-filled project pipeline.

We are looking for a responsible and independent individual to join us immediately or by arrangement as a

System Technician Electrification (100%)

What you can do

- Implementing projects and assisting in the electrification of mobile and industrial machines
- Developing and realizing customer-specific electrification solutions for mobile and industrial machines
- Coordinating assemblies, conducting in-house testing, and commissioning on-site

What you bring with you

- Technical vocational training in electrical engineering, automotive engineering, or mechanical engineering
- Further education as an FH engineer or HF technician in systems engineering, electrical engineering, automotive/vehicle technology, mechatronics, or a similar field
- Experience in electrification and handling electronic control systems
- Knowledge in the fields of technical product development, electric drive systems, automation, control technology, commercial vehicles, or related areas (e.g., electric vehicles)
- Languages: German, English, French (advantageous)
- Experience with 3D CAD software
- Enjoyment of interdisciplinary work
- Willingness to travel for assemblies and commissioning
- Reliable, independent, and precise work style

Our advantages for you

- You can expect diverse and interesting tasks with a high level of responsibility and independence in a dynamic work environment.
- In addition to excellent social benefits and progressive employment conditions (5 weeks of vacation, home office options, 42-hour workweek, bridge days, flexible working hours, free parking, company events), we offer a modern workplace.
- We pride ourselves on transparent and straightforward business practices within a family-oriented company.

We enjoy a strong reputation in the industry. Get an insight into our exciting and diverse work at www.bibushydraulik.ch.

BIBUS HYDRAULIK

Your contact

Does this multifaceted challenge appeal to you? Then we look forward to receiving your detailed application documents with photo to Mrs Marisa D'Elia (del@bibus.ch).

If you have any technical questions about the advertised position, please call Mr Dieter Korte on +41 44 877 52 30 for further information.
