

## BIBUS HYDRAULIK

**BIBUS HYDRAULIK AG**, a renowned Swiss industrial company, is recognised as a leading system integrator in the fields of engineering, trading and services for hydraulic system solutions in both the mobile and industrial market segments. As a full-service provider, we develop customised solutions for our customers and lead them towards the future through the integration of electrified systems and the development of our own control software.

To strengthen our existing team, we are looking for a skilled, reliable and committed individual to join us immediately or by agreement as a

### Technical Project Manager Hydraulics (100%)

#### What you can do

- Develop technical solutions for hydraulic systems together with customers
- Prepare technical concepts and hand them over to engineering for detailed design
- Manage projects from the initial idea through implementation to series production readiness
- Provide technical customer support and direct supplier coordination
- Actively support and collaborate with project managers, sales, service and assembly teams

#### What you bring with you

- Completed technical vocational training, preferably as an agricultural or construction machinery mechanic
- Further education as a technician HF, FH or equivalent is an advantage
- Experience in developing technical solutions in the field of hydraulics
- Technical understanding combined with a creative mindset
- Willingness to travel approximately 40 to 60%
- Good IT user skills and sound knowledge of common Microsoft Office applications (Word, Excel, Outlook, PowerPoint)
- ERP knowledge, MS AXAPTA / D365 is an advantage
- Languages: German and English spoken and written, French is an advantage
- Home office and a decentralised place of residence are possible
- Reliable, independent and precise working style

#### Our advantages for you

- An interesting, responsible and highly independent role with personal development opportunities
- Working on projects and applications together with customers gives you the opportunity to apply and continuously develop your skills. You will always be close to innovation in the Swiss market.
- A constructive working environment with clear information flows and interdisciplinary collaboration across many areas
- Attractive social benefits and progressive employment conditions (5 weeks of holiday, home office, 42-hour week, bridge days, flexible working hours, free parking, company events) as well as a modern workplace
- Transparent and straightforward structures in a family-oriented company
- A company car and mobile devices (notebook, mobile phone, etc.) are naturally provided. The company car may also be used privately.
